

## CYBERSECURITY

### [US-CERT Issues Advisory About Vulnerabilities in Patient Monitors](#)

The U.S. Department of Homeland Security Industrial Control Systems Cyber Emergency Team (US-CERT) recently issued an advisory outlining three vulnerabilities of Drager Infinity Delta patient monitoring devices. The vulnerabilities affect all versions of the Drager models—Delta, Delta XL, Kappa and infinity Explorer C700—patient monitoring devices. [Read more](#)

## DATA PRIVACY

### [Privacy Concerns Lead OSHA to Rescind Its Electronic Filing Requirement](#)

In response to concerns raised by employers and to protect worker privacy, the Occupational Health & Safety Administration (OSHA) recently amended its recordkeeping regulations to eliminate the requirement that larger employers must submit certain information electronically. The final rule rescinds the mandate that establishments with 250 or more employees had to electronically submit information from OSHA Form 300 (Log of Work-Related Injuries and Illnesses) and OSHA Form 301 (Injury and Illness Incident Report) to OSHA each year. [Read more](#)

## DATA BREACH

### [Community Health System Agrees to Settlement of \\$4.5 Million for 2014 Data Breach](#)

Community Health System, located in Tennessee, has agreed to settle claims made against it arising from a 2014 data breach for \$4.5 million. The data breach, believed to have been caused by Chinese hackers, compromised the names, dates of birth, addresses, telephone numbers, and Social Security numbers of some 4.5 million patients of the hospital system, which operates in multiple states. [Read more](#)

## NEW + NOW

### [Protecting Against Wire Fraud and Man-in-the-Middle Schemes](#)

Scammers continue to find easy ways to dupe unsuspecting businesses into sending information or money to them. It used to be that we had to address vast fraud schemes with phishing emails requesting the W-2s of employees. That is child's play now, as most companies are aware of

## DRONES

### [Super Bowl Intel Drone Light Show](#)

Intel won't reveal exactly how it was able to participate in the Super Bowl LIII halftime show, but it did disclose that it used 150 Intel Shooting Star drones to spell out the words "ONE" and "LOVE" during the musical performance. As Maroon 5 began singing "She Will be Loved," Intel initiated its software, directing 150 drones to float up and over the enclosed field. This show beat Intel's previous indoor world record when it used 110 drones for an exhibit at the Consumer Electronics Show (CES) 2018. [Read more](#)

### [Technology Boost Helps Protect Super Bowl LIII](#)

The biggest sporting event of the year is now over, and the Patriots—with the help of NFL super duo Tom Brady (the oldest quarterback to ever win the Super Bowl) and Bill Belichick (the oldest head coach to ever win the Super Bowl)—took the title, New England's sixth since 2002. More than 100 million people watched the game from home and over 70,000 watched it from inside Mercedes-Benz Stadium in Atlanta. However, what many fans may not have realized is that while they were watching the game from the stands, they themselves were being watched. [Read more](#)

## AUTONOMOUS VEHICLES

### [EasyMile Autonomous Vehicle Hits the Roads in Denver](#)

Last week, the EasyMile electric autonomous shuttle debuted on the roads in Denver, Colorado, marking the first autonomous vehicle venture in the state. The EasyMile is a self-driving shuttle that is scheduled to operate for the next 4-6 months connecting passengers from commuter rail stations to the EasyMile office and Park-n-Ride lots. The goal of this venture is to "assess the viability of autonomous services in providing first and last mile connections to and from transit." [Read more](#)
