CYBERSECURITY

[Ransomware Group Uses Communication System of University](#)

Threat actors never cease to find innovative ways to extort their victims. If only threat actors would use their creativity for good causes.

This week, Bluefield University communicated with its students to be careful of texts sent through the University's communication system after a ransomware group used the communication system to [message](#) the campus about a ransomware attack in progress. [Read more](#)

ARTIFICIAL INTELLIGENCE

[IP Challenges and Risks Unique to AI – Part I](#)

Businesses are increasingly using artificial intelligence (AI) to innovate. This trend brings about new risks to intellectual property (IP), including new challenges in procuring IP protection and new risks of IP infringement. Part I of this two-part post will focus on IP procurement. [Read more](#)

[CISA Director Urges Regulation of the Use of Artificial Intelligence](#)

While recently speaking at a conference hosted by Vanderbilt University, Jen Easterly, the Director of the Cybersecurity Infrastructure Security Agency (CISA) urged the development of regulations around the use of artificial intelligence (AI). According to reporting by Reuters, Easterly recalled the lessons learned from the lack of security in the design of the Internet and software and the relationship between social media platforms and mental health issues. According to Reuters, Easterly commented that "the failure to identify risks before past technologies were widely deployed has left policy-makers and cyber defenders scrambling to address the worst threats from those developments." [Read more](#)

PRIVACY TIP #362

[Looking for a Professional Path? Consider Artificial Intelligence](#)

This week's Privacy Tip foreshadows an opportune job market as private industry, government agencies, consulting agencies, etc. are looking for talent in the AI space. [Read more](#)
